1 Introduction

In its everyday business operations Mayfair Trade Ltd makes use of a variety of data about identifiable individuals, including data about:

- Current, past and prospective employees
- Customers
- Users of its websites
- Other stakeholders

In collecting and using this data, our company is subject to a variety of legislation controlling how such activities may be carried out and the safeguards that must be put in place to protect it.

The purpose of this policy is to set out the relevant legislation and to describe the steps Mayfair Trade Ltd is taking to ensure that it complies with it.

This control applies to all systems, people and processes that constitute the organization's information systems, including board members, directors, employees, suppliers and other third parties who have access to Mayfair Trade Ltd systems.

2 Privacy and Personal Data Protection Policy

2.1 The General Data Protection Regulation

The General Data Protection Regulation 2016 (GDPR) is one of the most significant pieces of legislation affecting the way that Mayfair Trade Ltd carries out its information processing activities. It is Mayfair Trade Ltd policy to ensure that our compliance with the GDPR and other relevant legislation is clear and demonstrable at all times.

2.2 Definitions

There are a total of 26 definitions listed within the GDPR and it is not appropriate to reproduce them all here. However, the most fundamental definitions with respect to this policy are as follows:

Personal data is defined as:

any information relating to an identified or identifiable natural person ('data subject'); an identifiable natural person is one who can be identified, directly or indirectly, in particular by reference to an identifier such as a name, an identification number, location data, an online identifier or to one or more factors specific to the physical, physiological, genetic, mental, economic, cultural or social identity of that natural person;

'processing' means:

any operation or set of operations which is performed on personal data or on sets of personal data, whether or not by automated means, such as collection, recording, organisation, structuring, storage, adaptation or alteration, retrieval, consultation, use,

disclosure by transmission, dissemination or otherwise making available, alignment or combination, restriction, erasure or destruction;

'controller' means:

the natural or legal person, public authority, agency or other body which, alone or jointly with others, determines the purposes and means of the processing of personal data;

2.3 Principles Relating to Processing of Personal Data

There are a number of fundamental principles upon which the GDPR is based.

These are as follows:

1. *Personal data shall be:*

(a) processed lawfully, fairly and in a transparent manner in relation to the data subject ('lawfulness, fairness and transparency');

(b) collected for specified, explicit and legitimate purposes and not further processed in a manner that is incompatible with those purposes; further processing for archiving purposes in the public interest, scientific or historical research purposes or statistical purposes shall, in accordance with Article 89(1), not be considered to be incompatible with the initial purposes ('purpose limitation');

(c) adequate, relevant and limited to what is necessary in relation to the purposes for which they are processed ('data minimization');

(d) accurate and, where necessary, kept up to date; every reasonable step must be taken to ensure that personal data that are inaccurate, having regard to the purposes for which they are processed, are erased or rectified without delay ('accuracy');

(e) kept in a form which permits identification of data subjects for no longer than is necessary for the purposes for which the personal data are processed; personal data may be stored for longer periods insofar as the personal data will be processed solely for archiving purposes in the public interest, scientific or historical research purposes or statistical purposes in accordance with Article 89(1) subject to implementation of the appropriate technical and organizational measures required by this Regulation in order to safeguard the rights and freedoms of the data subject ('storage limitation');

(f) processed in a manner that ensures appropriate security of the personal data, including protection against unauthorized or unlawful processing and against accidental loss, destruction or damage, using appropriate technical or organizational measures ('integrity and confidentiality').

2. *The controller shall be responsible for, and be able to demonstrate compliance with, paragraph 1 ('accountability').*

Mayfair Trade Ltd will ensure that it complies with all of these principles both in the processing it currently carries out and as part of the introduction of new methods of processing such as new IT systems.

2.4 Rights of the Individual

The data subject also has rights under the GDPR. These consist of:

1. The right to be informed
2. The right of access
3. The right to rectification
4. The right to erasure
5. The right to restrict processing
6. The right to data portability
7. The right to object
8. Rights in relation to automated decision making and profiling.

Each of these rights are supported by appropriate procedures within Mayfair Trade Ltd that allow the required action to be taken within the timescales stated in the GDPR.

2.5 Lawfulness of Processing

There are six alternative ways in which the lawfulness of a specific case of processing of personal data may be established under the GDPR. It is Mayfair Trade Ltd policy to identify the appropriate basis for processing and to document it, in accordance with the Regulation. The options are described in brief in the following sections.

2.5.1 Consent

Unless it is necessary for a reason allowable in the GDPR, Mayfair Trade Ltd will always obtain explicit consent from a data subject to collect and process their data. Transparent information about our usage of their personal data will be provided to data subjects at the time that consent is obtained and their rights with regard to their data explained. This information will be provided in an accessible form, written in clear language and free of charge.

If the personal data are not obtained directly from the data subject then this information will be provided to the data subject within a reasonable period after the data are obtained and definitely within one month.

2.5.2 Performance of a Contract

Where the personal data collected and processed are required to fulfil a contract with the data subject, explicit consent is not required. This will often be the case where the contract cannot be completed without the personal data in question e.g. a delivery cannot be made without an address to deliver to.

2.5.3 Legal Obligation

If the personal data is required to be collected and processed in order to comply with the law, then explicit consent is not required. This may be the case for some data related to employment and taxation for example, and for many areas addressed by the public sector.

2.5.4 Vital Interests of the Data Subject

In a case where the personal data are required to protect the vital interests of the data subject or of another natural person, then this may be used as the lawful basis of the processing. Mayfair Trade Ltd will retain reasonable, documented evidence that this is the case, whenever this reason is used as the lawful basis of the processing of personal data. As an example, this may be used in aspects of social care, particularly in the public sector.

2.5.5 Task Carried Out in the Public Interest

Where Mayfair Trade Ltd needs to perform a task that it believes is in the public interest or as part of an official duty then the data subject's consent will not be requested. The assessment of the public interest or official duty will be documented and made available as evidence where required.

2.5.6 Legitimate Interests

If the processing of specific personal data is in the legitimate interests of and is judged not to affect the rights and freedoms of the data subject in a significant way, then this may be defined as the lawful reason for the processing. Again, the reasoning behind this view will be documented.

2.6 Privacy by Design

Mayfair Trade Ltd has adopted the principle of privacy by design and will ensure that the definition and planning of all new or significantly changed systems that collect or process personal data will be subject to due consideration of privacy issues including the completion of one or more data protection impact assessments.

Use of techniques such as data minimization and anonymization will be considered where applicable and appropriate.

2.7 Contracts Involving the Processing of Personal Data

Mayfair Trade Ltd will ensure that all relationships it enters into that involve the processing of personal data are subject to a documented contract that includes the specific information and terms required by the GDPR.

2.8 International Transfers of Personal Data

Transfers of personal data outside the European Union will be carefully reviewed prior to the transfer taking place to ensure that they fall within the limits imposed by the GDPR. This depends partly on the European Commission's judgement as to the adequacy of the safeguards for personal data applicable in the receiving country and this may change over time.

2.9 Data Protection Officer

A defined role of Data Protection Officer (DPO) is required under the GDPR if an organization is a public authority, if it performs large scale monitoring or if it processes particularly sensitive types of data on a large scale. The DPO is required to have an appropriate level of knowledge and can either be an in-house resource or outsourced to an appropriate service provider.

Based on these criteria, Mayfair Trade Ltd does not require a Data Protection Officer to be appointed.

2.10 Breach Notification

It is Mayfair Trade Ltd policy to be fair and proportionate when considering the actions to be taken to inform affected parties regarding breaches of personal data. In line with the GDPR, where a breach is known to have occurred which is likely to result in a risk to the rights and freedoms of individuals, the relevant supervisory authority will be informed within 72 hours.

3 Addressing Compliance to the GDPR

The following actions are undertaken to ensure that Mayfair Trade Ltd complies at all times with the accountability principle of the GDPR:

- The legal basis for processing personal data is clear and unambiguous
- All staff involved in handling personal data understand their responsibilities for following good data protection practice
- Training in data protection has been provided to all staff
- Rules regarding consent are followed
- Routes are available to data subjects wishing to exercise their rights regarding personal data and such enquiries are handled effectively
- Regular reviews of procedures involving personal data are carried out
- Privacy by design is adopted for all new or changed systems and processes
- Documentation of processing activities is recorded

These actions are reviewed on a regular basis as part of the management process concerned with data protection.
